NOTES

- Pattern drawing for identification and fit-check, redrawn by TLA from its drawing TLBC260 REV 01. Forging detail simplified. Not for manufacture.
- Plain dimensions are from TLBC260. Hook, boss, hex and lock-nut shapes are scaled and not dimensioned.
- Drawn at L = 280. Hook positions on the rod vary with the clamp setting.
- Hooks engage the top apertures, or the side apertures, of two adjacent ISO 1161 top corner castings. Tighten at the central hex, then lock the nut.
- Horizontal use only — never vertically between stacked containers (the hooks do not grip). Not a lifting point. Do not move or lift containers while they are clamped together.
